

RAVEN'S SCAR

RAVEN'S SCAR

OS Landranger Sheet: 93

Map Ref: NZ566037

Altitude: 390m

Aspect: North Facing

Approach: 20 minutes

Mod - Severe	21
HS - HVS	41
E1 - E3	21
E4 and above	9
Bouldering	5

History

The first climbers to report their visit to Raven's Scar were C.E. and D. Burrow and party in 1912-13. C.S. and T.H. Tilly were also there in 1932; unfortunately there are no records of this early exploration. Raven's Scar then seems to have been neglected until 1954 and 1955, when members of the Cleveland Mountaineering Club made a concentrated effort to develop the crag. The first climbs in 1954 were the work of Richard Whardell who eventually unearthed and climbed *Tumble Down Dick*, *Dirty Dick*, and *Sunshine Slab*. This paved the way for Alan Chester to ascend the impressive Waterslide, and John Hickman to climb the tough *Ahab*. A number of other routes were climbed at this time, but as few records exist it has not been possible to attribute ascents to individuals. In the latter part of the 1950s Terry Sullivan was very productive adding several excellent climbs including, the classic Forest Face with Vic Tosh, and the following year the bold *Harlot's Groove* with Johnny Clark and Alan Linford. Artificial aid climbing was popular throughout Britain in the 1950s as it was considered a basic skill needed for summer holidays in the Alps and Dolomites. One of the leading exponents of aid climbing in North Yorkshire at this time was Terry Sullivan, who accompanied by several partners produced several popular routes including *Satchmo*, *Stardust* and the brilliant *Ella*. It is worth mentioning that aid climbing was widely practised during the winter months, usually in appalling weather conditions, cold, wet and often snowing. All the climbs were filthy, filled with dirt and grass and there was no attempt to climb these routes free at that time. Other routes were climbed with aid but the subsequent change in attitudes and improved protection techniques led to those routes being attempted free. Of particular note, were Tony Marr's first free ascent of *Satchmo* in 1970, followed by John Redhead and Chris Shorter's free ascent of *Ella* in 1977, to produce the classic test piece *Stratagem*. About the same time John Redhead and Chris Shorter also added the technical *Screwed* and the superb *Fever Pitch*. Paul Ingham filled a few gaps by free climbing *Pencil Line* and adding the testing *Hooker* in the same day. During the mid 1990's Francis (Monty) Montague has produced many routes including the bold *Monty's Variant* and the sensational *Ch-Ching*. The ever-keen Tony Marr with Mike Tooke, Frank Fitzgerald and Pete Shawcross filled a few gaps with routes including *Rough and Tumble*, *Terminal Entry* and *Dirt Devil* during 1996. In the summer of 2010 Steve Ramsden added the two hardest routes to the crag with *A Different Kind of Blue* and *Collateral*.

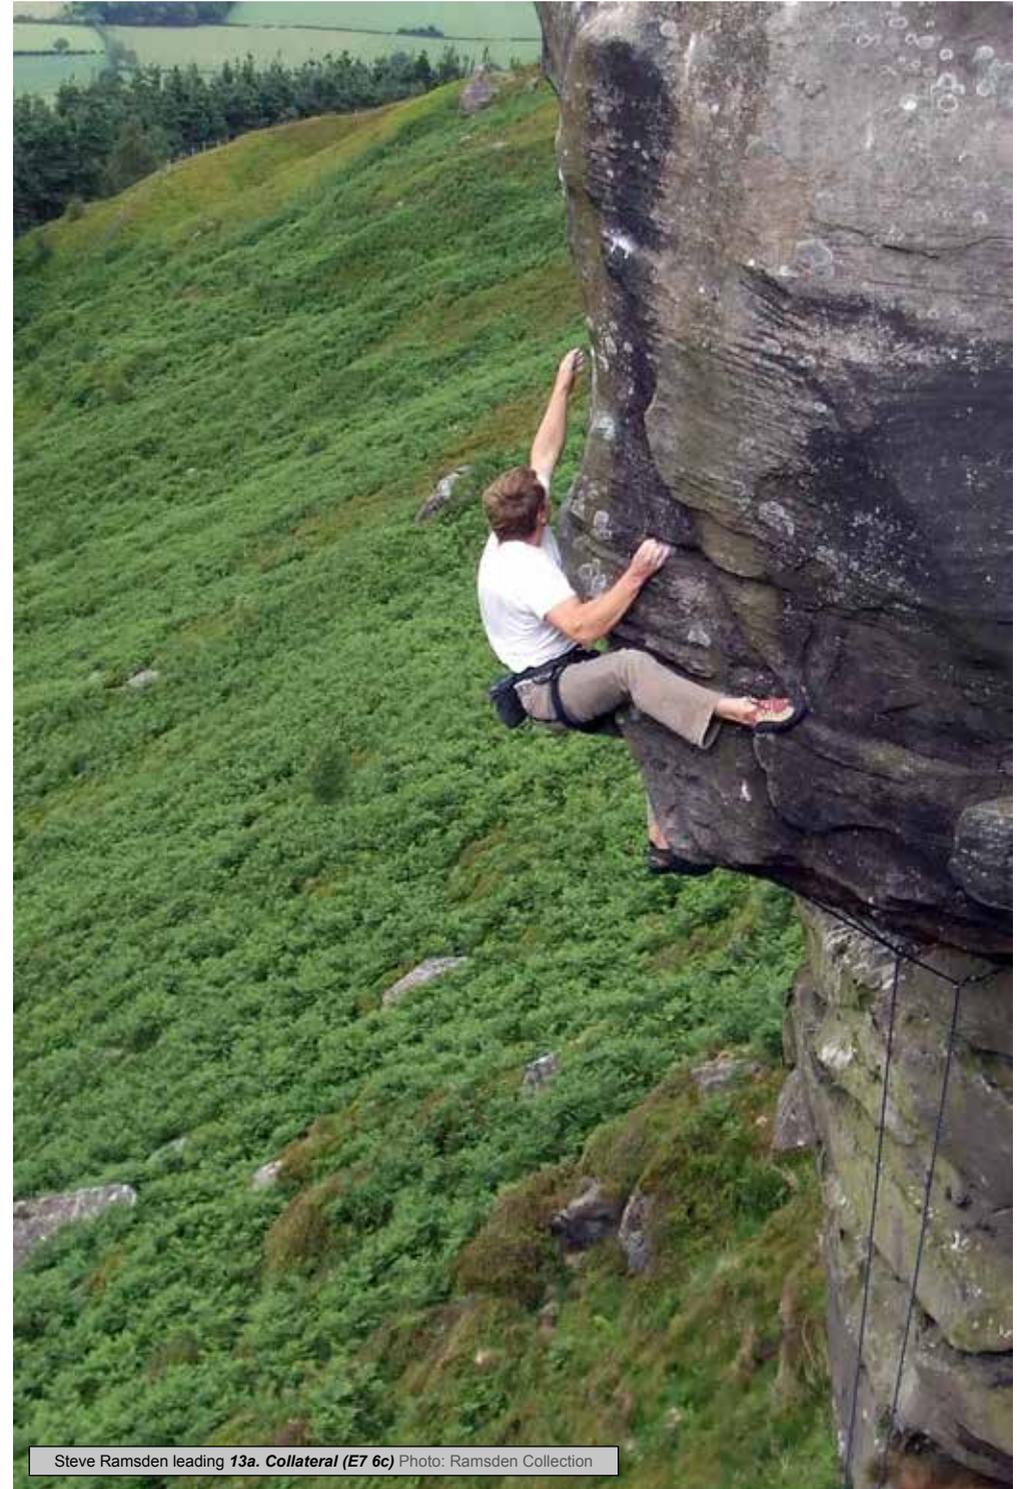

Situation and Character

Situated high on the north side of Hasty Bank with commanding views over the Vale of Cleveland, Raven's Scar is one of the area's finest sandstone outcrops. The crag's northerly aspect and dark foreboding appearance are misleading, as the climbs are generally clean and enjoyable. The best time to visit is from late spring onwards when the crag loses its mantle of green, and it is particularly good on a fine summer's evening when it catches the sun. Allow two days after rain for the rocks to dry. The climbs generally follow steep natural lines, usually well protected and often strenuous. Climbers looking for quality, middle and upper grade routes will not be disappointed, as some are "classics" comparable with any in the country.

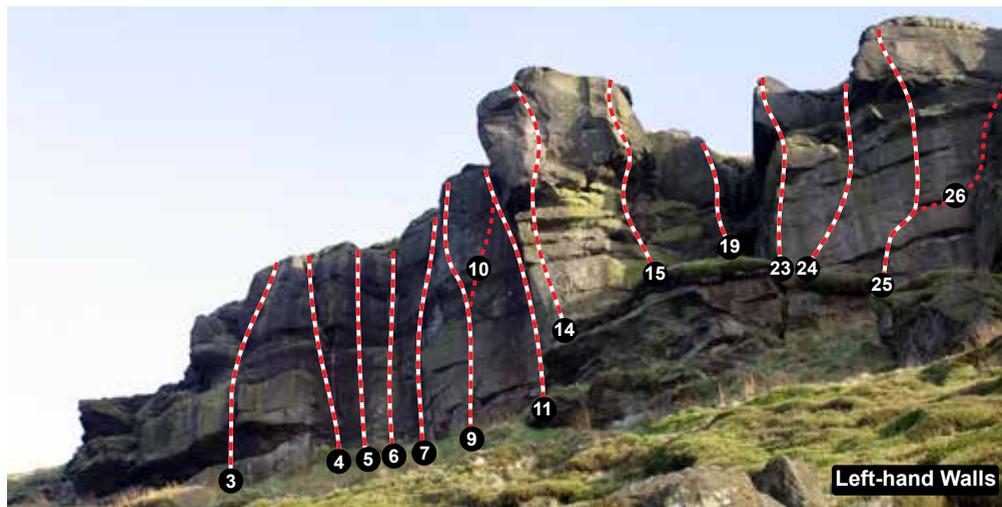

Access and Approaches

Approach as for the Wainstones from the car park near the summit of Clay Bank, 2 miles south of Great Broughton on the B1257 Stokesley to Helmsley road. Leave the car park, walk along the road towards Helmsley and from its right hand side gain the forestry track up the flank of Hasty Bank. The track soon turns from south back to northwest and eventually west as it levels out above the forestry plantations. Pass beneath the large but broken crag of Landslip and follow the track as it dips gently down through trees to emerge at the access stile below the impressive rocks of Raven's Scar. Note: - The crags of the Wainstones and Broughton Bank are only a further 5 minutes walk enabling all these outcrops to be easily visited in a single day.

The Climbs

The climbs are described from left to right.

1. Evening Wall 11m HS 4b

Start 3m from the extreme end of the crag at a cleft chimney. Climb the right wall of the cleft to a ledge; move up and left to finish up the obvious slanting crack in the wall.

Variation finish: 4a

From the ledge, escape up and around the nose of the buttress using a good hold and rock over move.

Route and variant, Tony Marr, Paul Ingham 22nd May 1979

2. Thrasher 11m VS 4c

Start 3m right of *Evening Wall*. Climb over the roof into a niche on good holds. Gain the ledge and finish up a slabby groove.

Geoff Fixter, Eric Marr 1961.

3. Suede Shoe Shuffle 11m HVS 5c

A little right of *Thrasher* is a shallow corner in the overhang. Climb this "problematically" to the ledge and continue in a direct line up the blunt buttress.

Chris Shorter, solo, wearing "Hush Puppies". Summer 1978

4. En Passant 11m S 4a *

The prominent corner and hanging groove direct. Well worth doing.

Cleveland MC 1954/5.

5. Afterthought 11m HVS 5a

Trend left up the centre of the slab to finish up the middle of the left wall.

Paul Ingham, Tony Marr, Ken Jackson 10th June 1979.

6. Lazy Bones 11m HS 4b *

Climb the corner at the right side of the slab into the main groove up which the climb finishes. The climbing is much better than it looks, requiring some unusual techniques!

Terry Sullivan and party. 1955

7. Grooves-ology 11m VS 5a **

Start for *Lazy Bones* but gain the ledge on the right. The layback cracks above provide the exit. Good climbing.

FA Vic Tosh, John King. Winter 1961 (3 pegs for aid).

FFA Tony Marr, Bob Lodge June 1965. The first of the crag's aid climbs to succumb to a free ascent.

8. Stardust 12m E1 5b *

A flake crack leads to the ledge shared with *Grooves-ology*. Climb the right-hand peg-scarred crack to the top.

FA Terry Sullivan, Vic Tosh. Winter 1957. (4 pegs for aid).

FFA Bob Hutchinson, John Earl May 1977.

9. Screwed 13m E5 6b

Start just right of *Stardust* at a shallow corner. Climb the shallow corner, move right, and then climb directly up the wall to the break. Step up left then right onto a higher ledge. Pull over the bulge then trend left (protection in *Stardust*) to finish up the overhanging arête above. Bold and poorly protected.

John Redhead, Chris Shorter, Summer 1978.

Incorrectly named Screwy in previous guides. An aid climb called "Screwy" climbed the wall further to the right using "curtain hooks" for aid, all removed.

FA Roy Burrows, Mike Stellings 1963.

Variation Start: Slightly harder than the normal start. Climb the wall right of the normal start using a pocket to gain the higher ledge.

Paul Ingham, Tony Marr, Ian Dunn 1980.

10. Screwed (RH Finish) 14m E3 6a

From the higher ledge pull up and trend rightwards to finish up the final few feet of *Satchmo*.

Paul Ingham, Nick Dixon, Ian Dunn (all led), and at the "blunt" end Tony Marr. 1980.

11. Satchmo 15m E2 5c ***

Climb the impressive overhanging corner throughout. This well protected route is a classic test piece.

FA Terry Sullivan. 18th November 1956. This was the first of Sullivan's many new route names combining his passion for Jazz and climbing.

FFA Tony Marr (second declined to follow) 6th June 1970.

"Chris Woodall and I had whittled down the aid to two jammed nuts in the final corner in 1969. The following year I returned with my brother Eric. I was feeling fitter and stronger, and the whole route went with remarkable ease, I couldn't understand why we hadn't done it previously".

12. A Different Kind of Blue 16m E7 6c ***

Climb the beginning crux of *Satchmo* before breaking right to arrive at the large central break/ledge of the buttress. Having arranged protection from the ledge, climb the steep hanging flake left of the arête with a hard move to gain a line of horizontal slots. Follow these rightwards to an impressive position and a large flat hold on the arête. From here, span right to vague side-pulls and gain a sloping shelf beneath a tiny roof. Good holds at the top of the *Stratagem* crack system can now be reached, finish as for that route.

Steve Ramsden 22nd April 2010

13. Ch-Ching 16m E6/7 6c **

Start at the lowest point of the great leaning arête. Levitate up the arête with a hard move to reach a good ledge. Continue more easily until below the final impressive section. Step right and finish up *Stratagem*. Powerful climbing throughout.

Francis Montague "Monty", Martin Parker, Martin Trenholm 14th June 1996.

14. Stratagem 13m E5 6b ***

Impressive as an aid route but now even more impressive as a free climb. Unrelenting throughout. Pull over the bulge and climb a thin crack to ledges (thread). **Watch out for nesting Fulmars!** Continue up the impending headwall via the crack (peg runners) to a thought-provoking finish.

FA Terry Sullivan, Neville Colligan. Spring 1961. (6 pegs for aid). Originally named "Ella" by Sullivan, maintaining his theme and passion for Jazz.

FFA John Redhead, Chris Shorter, Summer 1977

15. Collateral 14m E7 6c **

A steep wall just right of the start of *Stratagem* gains easy ledges and a position below a large roof. Cross the roof at its widest point to emerge just right of the arête. Boldly climb the hanging blunt arête/prow to a shallow left-facing groove and, thankfully, an easier top out.

Steve Ramsden 22nd April 2010

16. Apache Roof 13m E3 5c

Start just right of *Collateral* and climb the overhanging wall direct to an overhung ledge. Follow the crack over the roof and finish up the slab. Contrived but with some hard moves and poor protection.

Nick Dixon, Graham Buckley 1981

Problems:

Some interesting problems and circuits can be performed on the overhanging wall at the start of *Stratagem* and *Apache Roof* which tends to stay dry in bad weather. The most popular problem is the low-level traverse/circuit from *Stratagem* to the gully on the right and back at **5c**.

17. Sunshine Slab 10m VD *

Climb over jammed blocks in the gully and follow ledges left to finish up a slabby corner.

Richard Whardell 1954.

18. Sunstroke 10m MS

Start as for *Sunshine Slab*. Climb the jammed blocks into the gully. Exit up the flake crack in the left wall avoiding the damp in the back of the gully.

Tony Marr, Mike Tooke 23rd June 2010

19. Sunny Delight 8m E1 5b

Start as for *Sunshine Slab* to the ledge then continue up the smooth arête. Bold and poorly protected.

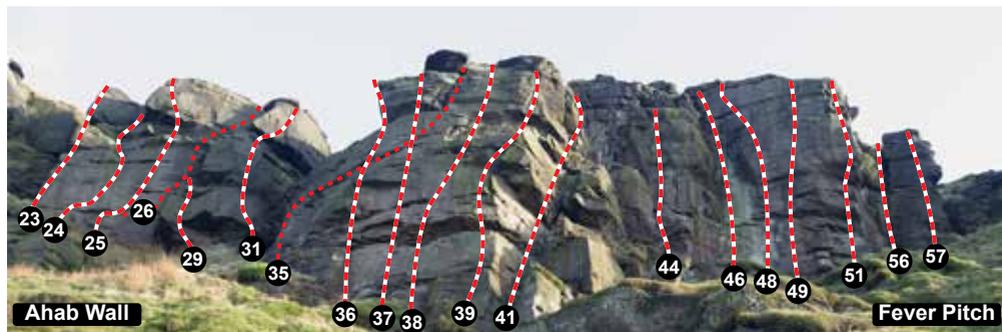

Tony Marr (solo) 5th June 1979. Climbed by mistake, thinking it was the elusive "Chalky's Route".

Variation Start 5m HS 4b

From the foot of the gully take the ramp leading to the large ledge on the left (junction with *Apache Roof*). Climb the steep wall on the right (a long reach helps) to the good ledge, step right and finish up the normal route.

FA Tony Marr, Mike Tooke 04/07/10. (Difficult to grade because its reach dependant, could be 5a)

The gully can be ascended in its entirety at HVD but it is unfortunately often wet and dirty and not recommended.

Ahab Wall

20. Little Gem 8m HVS 5a

Start at the foot of the gully. Climb the flake crack just right of the jammed blocks in the gully to the overhung ledge. The hanging finger crack provides a sporting finish.

Tony Marr, Mike Tooke 24th July 1994.

21. Micro Crack 10m HVS 5b

Follow *Little Gem* to the overhung ledge (*Little Gem* takes the finger crack above). Move left for about 2m to a thinner crack. Climb this crack/wall on its left to a difficult exit. Delicate.

FA Tony Marr, Mike Tooke 04/07/10.

22. Flight of Fancy 10m HS 4b

Start just left of *Too Young To Fly*. Climb the arête on its left side to the large ledge (awkward). Cross the grass ledge into the alcove and escape up the corner crack.

Tony Marr, Mike Tooke 23/06/10

23. Too Young To Fly 10m HVS 5a *

Start just right of the gully at the arête. Climb the arête on its right side using "kangaroo" technique to the ledge. Finish up the slab using a crack (harder than it looks).

Chris Shorter, John Redhead Easter 1977. Also known as Chalky's Route 'Chalky' was one of Chris Shorter's nicknames at that time .

Direct Finish 5c*

Follow the normal route to the good ledge beneath the final knife edge arête. Climb the arête on its right side. (The first moves/getting established on the arête are thin....and probably height dependent!)

Tony Marr 19th June 2013 the second did not follow.

Note: The final arête is barely 4m tall but without protection until after the crux. A slip from the arête would be serious! I protected myself using a bit of "jiggery pokery" same as used by Ben Bransby on Runnel Trilogy at Brimhamif its ok for super stars then its ok for me!

24. Loose Ends 10m E2 5c *

Start for previous route but traverse immediately right (feet in horizontal break) for 3m to a slot. Climb straight up to join a shallow corner and edge. There are a choice of finishes or an option to walk off.

Tony Marr (solo) 3rd May 1985.

25. Rock Bottom 13m E3 6b *

Above the hand traverse of *Ahab* is a horizontal "pea pod". Gain the pod from the hand traverse, pull up and reach the next break and, if you are lucky, continue to the ledge. The final short wall succumbs with the aid of a protruding ledge.

Chris Shorter, John Redhead, alternate leads in two pitches. Summer 1977.

26. Ahab 12m HS 4b **

Hand traverse into the corner, pull up and climb to a ledge and final corner crack. A superb route with a strenuous start but good climbing throughout.

John Hickman 1954.

Direct Start 6a *

Avoid the hand traverse and climb the short problematic corner direct. Originally graded VS!! although the ground was less eroded in those days.

John Hickman circa 1959

27. Hard On 5c **

Climb the short hanging groove just right of the corner. An excellent problem.

John Redhead 1977

28. Rock On 6a *

Another problem. Gain the prominent nose and climb it on its left side.

Alan Taylor. Early 1980.

29. Jonah VS 5a *

Start under the jutting overhangs. Climb the short roof crack to finish up *Ahab*.

Tony Marr, Mike Stellings. Spring 1964.

Old School Boulder Problem:

It is possible to start at *Jonah* and swing under the roof to finish up *Hard On* or *Rock On* at 6a/6b; obviously the ground is out of bounds!

FRA Paul Ingham 1982.

30. Testament of Youth 5m 6b

Climb the blunt nose from a good starting hold and blind crack. The use of combined tactics is tempting but cheating!

Alan Taylor Early 1980. "Mr. Flexible" shows the way.

31. Moby Dick 12m VS 4b

Start from the gully. Traverse left above the overhangs then straight up to the ledge. Climb the delicate undercut wall right of the nose to finish. Note: The top block moves!

Cleveland MC 1954/5

Variation finish VS 4c

From the large ledge move a little further right and climb the corner, passing a hole.

Tony Marr 5th June 1979.

Forest Face

A couple of poor climbs have been made up the overhanging rocks forming the top of the gully but are not included here.

32. Dirty Dick 17m D

Start at the foot of the gully at a grassy ledge. Climb a short wall to a shallow cave. Traverse around left and up a short corner to a large ledge. Finish up the corner crack. Well named!

Richard Whardell. 1954

33. Dick's Delight 17m VS 4b

Start at the foot of the gully just left of *Dirty Dick*. Climb the arête to a good ledge at 2m (junction with *Dirty Dick*). Continue on the arête first on the left side then stepping onto the right side before gaining the large ledge. Belay possible. The climb finishes up the centre of the leaning right wall. Gain the obvious crack and follow it rightwards (Strenuous).

A deceptive climb, not without interest!

Tony Marr, Mike Tooke 23/06/10

34. Dirty Dick Direct 17m VS 5a

34 as for the normal route. From the cave at 3m climb straight up using a flake to gain the ledge, finish via the exposed arête on the right.

Tony Marr, Ken Jackson, Paul Ingham 5th June 1979

The next route is a Severe leader's delight, offering good climbing with superb positions at the upper end of its grade.

35. Forest Face 22m HS 4b ***

Start as for *Dirty Dick*. Climb into the cave then follow easy ledges rightwards in an exposed position to a thin vertical crack (crux), continue directly up the final bulging cracks and exit right.

Terry Sullivan, Vick Tosh. 1958.

36. Red Light 13m HVS 5a *

Start beneath the left end of the canopy. Climb the short right-facing corner to a ledge, continue up a thin crack to the large ledge and finish up the arête on the right.

Tony Marr, Alan Taylor, Paul Ingham, Tony McLean. 10th July 1979.

37. Naught For Your Comfort 16m E1 5c *

Climb directly up to and over the right end of the canopy. Continue in a direct line over the final bulges. Good but bold climbing.

Previously but incorrectly named Forest Face Direct. John Redhead, Chris Shorter. Easter 1977. Above the canopy the team finished up Forest Face. 2nd. Ascent, adding the independent finish, Paul Ingham, Tony McLean, Tony Marr, Alan Taylor 10th July 1979.

38. Hooker 16m E2 5c *

Start up a thin crack in the slab to the wide break. Make some technical moves to gain an obvious pocket and continue to a ledge system. A short wall and overlap lead to the top. Superb climbing requiring a confident approach.

Paul Ingham, Dave Wilson, Tony Marr. 12th May 1979.

39. Harlot's Groove 18m VS 4c **

Climb the left wall of the arête to the break. Pull up and make an awkward move into the V-groove; continue to the ledges. Finish via the inverted "V" and slab on its right. Good, sustained climbing throughout.

Terry Sullivan, Johnny Clark (Darlington), Alan Linford. Summer 1959.

The team were supposed to be going to the Lakes to climb Harlot Face but their transport failed to turn up. They ended up climbing and naming this route as a consolation prize.

40. Harlot's Body 18m HVS 5b

A variation on *Harlot's Groove*. Instead of climbing the V-groove, pull out right over the roof to finish up the slabby wall and final groove just to the right of the normal finish.

Paul Ingham, Ian Dunn, Nick Dixon. 1979.

Variation: Painted Lady Finish E1 5b

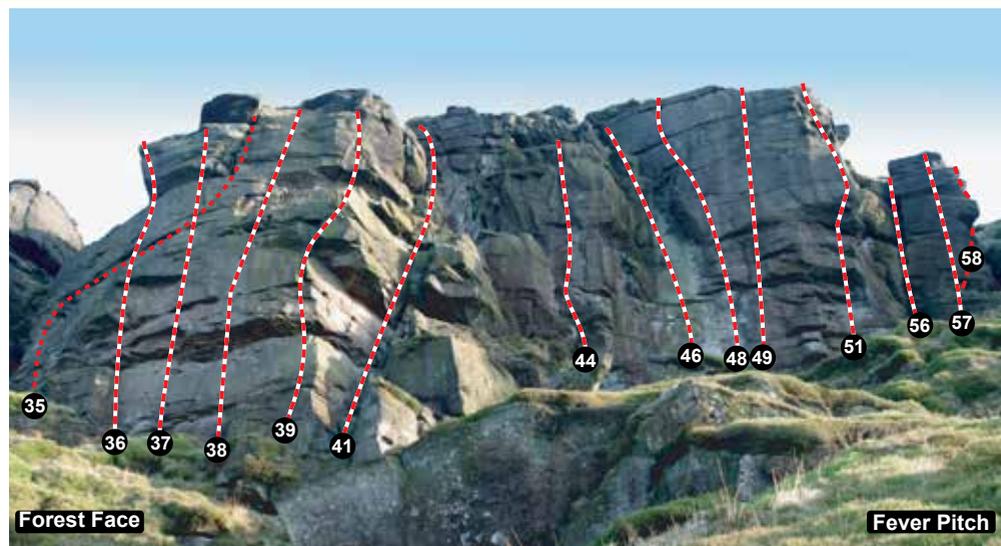

Finish straight over the top overhang.

Ian Dunn, Simon Walker 1980.

41. Tumble-Down Dick 28m D *

Start from the lowest point of the buttress. Climb up the gully to a large ledge (floor belay). Exit up the corner on the left.

Richard Whardell. 1954.

42. Rough and Tumble 22m HVS 5b
Consists of three short pitches. Start up the slope right of *Tumble Down Dick* at a slanting corner.
5b Climb the awkward corner to the grass ledge.
5a Attack the stepped nose at its centre and continue to a junction with *Tumble Down Dick* at the belay ledge.
4a Move left from the belay and climb a narrow crack splitting the bulge then continue to the top.
Tony Marr, Mike Tooke, Frank Fitzgerald. 30th July 1996.

43. Tumble-Down Crack 18m HS 4b
A poor start leads to an exciting exit. Start to the right of the last climb at the top of the slope. Easy ledges lead left to an open corner which is followed to the large ledge (floor belay). Ascend the fearsome overhanging groove until a step right leads to easier rock.
Cleveland MC 1954/5.

Alternative Start VS 5a
When combined with the normal finish it gives a worthwhile route, with some good climbing. Climb the thin corner crack to the large ledge.
Early 1960s.

The next climbs, *The Omen* and its *Variant*, can be started using the Alternative Start to *Tumble-Down Crack*; this however reduces their overall grade to **HVS**. The descriptions that follow are for fully independent climbs.

44. The Omen 18m E1 5a *
Start at the corner (Alternative Start). Climb the corner for 2m until it is possible to pull out

right and ascend a shallow corner/thin crack to a break. Continue up steep rock to gain the obvious hanging finger crack and finish direct. Steep and strenuous with some good climbing.
John Redhead, Chris Shorter. Easter 1977. Contrary to popular belief the route described is the one taken by the first ascent team.

Variation Finish-The Omen Arête E1 5b *
From just beneath the hanging finger crack, traverse right to the arête and finish up its right side. Bold.
Paul Ingham, Tony Marr. 10th July 1979.

45. Spell Bound 19m E2 5b *
Start 2m right of the corner. Ascend a steep wall to a ledge and groove. Pull up and left onto the arête and climb boldly straight up to join the *Omen Arête* up which it finishes.
Tony Marr, Linda Marr. 5th September 1992.

Fever Pitch Face

The next climb takes the steep, green groove and is much better, and cleaner than it looks.

46. Waterslide 19m HS 4b **
Climb the short wall to a ledge. Pull up onto the left wall then move across to the right to ascend past a prominent nose, trend left to finish.
Alan Chester. 1954.
A bold ascent for its time with only one running belay in the whole pitch, a sling draped over the prominent nose.

Variation finish 4a
From just above the nose follow the twin horizontal cracks right to finish.
Terry Sullivan and party 1957.

47. Waterslide Left Hand 19m HS 4b *
Start as for *Waterslide*. Climb to the foot of the main groove then follow the left corner throughout. Good climbing, although it can be dirty early in the season.
Tony Marr, Mike Tooke, Frank Fitzgerald. 10th July 1994

48. Fever Pitch 18m E2 5b **
Start just right of *Waterslide*. Climb a shallow groove to the bulge then move right and up to reach a crack. Swing back left and pull up to a ledge on the arête. Finish up the thin final crack. A very fine and bold pitch.
FFA John Redhead, Chris Shorter, Easter 1977. A free ascent of the 1964 aid climb Vigilante. On the first free ascent the climbers were forced to finish rightwards just below the top due to turf filled cracks. The direct finish, as described, was added the following year after a concentrated gardening effort.
FA Chris Shorter, John Redhead, Jim Deighton. Summer 1978.

49. Gangrene 18m E3 6b *
Climb the steep wall just right of *Fever Pitch* moving slightly left to a bulge. Pull up and pass a small ledge with difficulty and climb slightly right to finish. Steep with some hard moves, at the upper end of its grade.
Chris Shorter, John Redhead. Summer 1978. Shorter recalls his ascent, "I obviously wasn't too taxed by the climb as my diary records this as being just 5c."

50. Shorter's Wall 19m E5 6b
Start at the lowest point of the buttress. Climb steeply to an overhung shelf, move left and up, (protection in *Gangrene*) then back right and up to easier ledges. Not well protected.
Steve Finlay. June 1992. Finlay snatches Chris Shorter's unclimbed project with Chris belaying and giving encouragement.

51. Three Screaming Popes 19m E6 6c *
Climb up to the overhung shelf. Gain a good hold over the roof and continue directly up the arête on its left side. Poorly protected, bold and technical (what more could you wish for!).
FFA Chris Shorter 13th June 1992.
A free ascent of the 1964 aid climb Vendetta. A very fine and bold ascent of another much attempted line.
The next climb Links *Three Screaming Popes* with *Shorter's Wall*.

52. Monty's Variant 19m E7 6b
Leave the overhung ledge leftwards to join *Shorter's Wall* at its hard moves (but without the protection in *Gangrene*)!
Francis (Monty) Montague, Martin Parker. 10th August 1992

53. Italian Connection 19m E1 5b
Climb directly up the corner to gain the overhung shelf. Step right and pull through the bulge via a shallow weakness, move back left and finish up the right side of the arête. Poorly protected.
Tony Marr 14th August 1992.

54. Via Anna 16m VS 4b
Follows the thin vertical crack throughout, finishing through the large projections at the top. Start up the thin crack in the wall for a few metres until holds lead left to a ledge. Pull over the bulge at a good flake.
Terry Sullivan, Bill Dell, John Hickman. Pre 1959.
Direct 16m VS 4c **
Follow the thin vertical crack line throughout. The final smooth groove is fortunately not as hard as it looks. Protection is good.
Tony Marr, Mike Tooke 04/07/10.
Really only a direct finish but it transforms an already good climb into a superb climb. Why did I not spot it sooner!

55. Overhanging Wall 16m VS 5a
About 1m right of the thin crack of *Via Anna*. Climb the wall directly to a small cave beneath an overhang at about half height. The overhang is formed by "twin projections", the climb goes through the vee between them and finishes up easier rock to the right of the final large projection (*Via Anna Direct*).
Terry Sullivan. Pre 1959.

56. Blind Alley 16m VD
The obvious chimney.
Cleveland M.C. 1954/5.

57. Broadway 16m VS 5a
Straight up the centre of the buttress right of the chimney. The climb has a tricky start but fortunately becomes easier.
Terry Sullivan. Pre 1959.

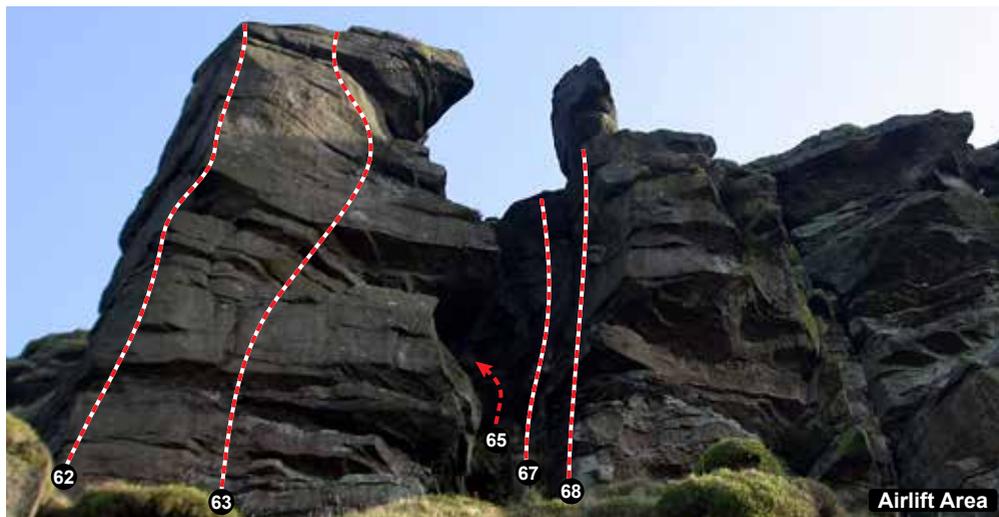

58. Broadside 16m S
Start as for *Broadway*. Gain the first ledge (this ledge is about chest height from the ground) then move to the right arête and follow a rising line of holds toward the gully on the right, pull over a bulge and trend back left to finish on the front face. Poorly protected.
Tony Marr, Mike Tooke 04/07/10

Rob Stone on
39. Harlot's Groove (VS 4c)
© Simon Caldwell,

Steve Crowe on
61. Airlift (S 4a)
© Karin Magog

Airlift Area

Across the grassy descent path.

59. Breathless 8m VS 4c

Start 2m left of *Airless* and immediately right of the arête. Climb straight up the steep wall on spaced holds. Strenuous and poorly protected.

Tony Marr, Mike Tooke 08/07/10

60. Airless 8m HS 4b

Climb the centre of the steep wall to an awkward finish.

Tony Marr 6th May 1979.

61. Airlift 10m S 4a *

Start just right of *Airless*. Ascend steeply up the left side of the arête, step around right at the top break to finish. Superb climbing with good positions.

Terry Sullivan and party. 1955. The name comes from Sullivan's service in the R.A.F.

Variation Start 5m S 4a

Start from the lowest point of the buttress on its front face. Climb the steep wall moving left to join the start of the normal route. A worthwhile addition which improves an already enjoyable climb.

1962. Many claims.

62. Fade Away 10m HS 4b

Follow the steep and strenuous arête throughout.

Roy Burrows. 1962.

63. Sam Stretch 16m VS 4c

Climb the centre of the impending front face of the buttress.

Chris Shorter, John Redhead. Easter 1977.

64. Left Wall 8m S 4b

The left wall of *Greasy Gully* to an overhang finish.

Tony Marr, Mike Stellings. 1964.

65. Greasy Gully 8m S 4a

The obvious gully to the right of *Sam Stretch*.

Cleveland MC 1954/5

66. Greasy Wall 12m VD

Climb the centre of the right wall. Often dirty.

Cleveland MC 1954/5

67. John Denver's Greatest S**t 12m VS 4c

Climb the 'V' at the extreme right side of the wall at the edge of the overhang.

Chris Shorter Easter 1977 "John Denver" was Shorter's nickname at that time.

68. Pencil Line 12m E3 5b

Ascend the centre of the impressive overhang on fragile holds. Bold and poorly protected.

FA As an aid climb. 1964. (3 pegs).

FFA Paul Ingham, Tony Marr, Dave Wilson 12th May 1979

69. Crocodile Chimney 12m D

Climb the V chimney just right of a prominent nose. Finish leftwards over easy ledges and a short corner.

Cleveland MC 1954/5

70. Monkey Puzzle 14m D

Better than it looks. Climb the wall right of the previous route to a ledge. Step left and finish up *Crocodile Chimney*.

Cleveland MC 1954/5

71. Durius Melius 13m E1 5b

Follow *Monkey Puzzle* to the roof. Pull straight over the roof at a nose of rock to a ledge. Step right and surmount the bulge at a pointed block. Bold and poorly protected.

John Redhead, Chris Shorter. Easter 1977.

72. Monkey Nut 13m VS 4b *

Climb the corner line to the ledge. Follow the finger crack over the bulge and finish direct. Often dirty but with some good climbing.

Terry Sullivan 1957

73. Telstar 15m VS 4c *

Climb the corner of *Monkey Nut* to the roof. Surmount the overhanging wall on the right on good holds in an impressive position. Finish over the final overhang.

Roy Burrows and party 1962.

Across the grassy gully and starting 2m left of the impressive corner is,

74. Montezuma's Revenge 9m VS 5a

Ascend the slab to a bulging wall then continue directly to a move right at a prow.

Ian Dunn 1981.

75. Roseberry Corner 8m HS 4b

The impending corner is climbed with increasing difficulty.

Cleveland MC 1954/5

76. Ledges 7m HVS 5a

Start just right of *Roseberry Corner*. Climb the wall on well defined ledges to a difficult escape onto the nose.

FFA Stewart Patterson, Chris Woodall. Late 1960s

77. Terminal Entry 8m HVS 5a

Start right of *Ledges* under the nose of the buttress. Climb up rightwards and through a notch in the overhang, trend up left to finish on the nose.

Tony Marr, M Tooke, F Fitzgerald, P Shawcross 15/9/1996

78. Dirt Devil 6m VS 4c

Climb the thin vertical crack right of *Terminal Entry*.

Tony Marr, P Shawcross, M Tooke, F Fitzgerald 15/9/1996

4m further right is a compact, isolated outcrop.

78a. Jackal 6m E1 5b

A good but deceptive climb that is harder than it looks. Start just left of the undercut base of the buttress at a short, vertical, blind crack. Climb

the awkward wall above the crack to the large break. Finish up the final wall just left of the nose [cruz]. Unfortunately, it is possible to avoid the main difficulties by escaping to the left.

Tony Marr, Mike Tooke 15/09/2011

78b. Sniper 6m HS 4b *

Start just right of the *Jackal*. Step up and make an awkward pull rightwards to gain the shelf. Continue straight up the fault line in the buttress to the top. Good, interesting climbing, reasonably clean, can be well protected with cams.

Tony Marr, Mike Tooke 8/09/2011

Across the grassy gully with its projecting rock feature is *Gun Buttress*.

79. Gun Buttress 10m M

Climb the centre of the rocks by way of the chimney, keep left at the ridge and turn the "Gun" on its right.

Cleveland MC 1954/5.

Twin Buttress

A few metres further right lays the next outcrop.

80. Castor 7m VD *

Starts at a spike at the foot of the left arête of the square recess. Climb the enjoyable arête throughout.

Cleveland MC 1954/5.

81. Scout Crack 5m D

The vegetated crack in the back right-hand corner of the recess. Not recommended.

Cleveland MC 1954/5

82. Pollux 8m D

Start from a boulder at the foot of the right arête of the recess. Climb the arête mainly on its left side. Finish leftwards along a flake. A pleasant climb.

Cleveland MC 1954/5

83. Star Trek 7m S

Climbs the wall to the right of *Pollux*. Start from the boulder (*Pollux*) and pull onto the wall using horizontal cracks. From the ledge finish up the left side of the nose.

Mike Tooke, Pete Shawcross. 25th August 1996.

Direct Start Severe

Begin 2m right of the boulder, climb the wall direct. (Same grade but more strenuous).

Tony Marr, Mike Tooke 17th August 2011

84. Dan Dare 8m D *

Start 3m right of the boulder of *Pollux* at a fine vee groove. Climb the groove, step right at the overhang and finish up the slab. An enjoyable pitch.

Mike Tooke, Tony Marr 17th August 2011

Further right still is Butt End Buttress Area.

Butt End Buttress Area

This neglected area of Raven's Scar offers some excellent climbs on good quality rock - worth a look!

85. Butt Head 5m VS 4c *

The steep buttress 5m left of *Green Gully*, is climbed direct.

Tony Marr, Mike Tooke, Pete Shawcross. 25th August 1996.

86. Square Chimney 5m D

The short corner 2m right of *Butt Head*.

Mike Tooke, Pete Shawcross. 25th August 1996.

87. Green Gully 7m VD

About 3m left of a cleft formed by a detached buttress is a shallow gully, climb it.

Cleveland MC 1954/5

88. Butt End Wall 7m S 4a

Climb the wall right of *Green Gully* on horizontal breaks.

Cleveland MC 1954/5

89. Tilt 8m VS 5a *

Start at the base of *Butt End Wall*. Gain the ledge on the right then follow the steep leaning arête on its right side. Good climbing.

Tony Marr, Mike Tooke, Pete Shawcross. 25th August 1996.

90. Home Front 8m VS 4b

Start just right of *Tilt* at the flake in the cleft. Gain the ledge then climb the wall via faint cracks.

Tony Marr, Mike Tooke, Pete Shawcross. 25th August 1996.

91. Smokey 12m D

Start from inside the cleft at its right end. Ascend the corner and groove to the top.

Cleveland MC 1954/5

Another climb *Joe VD* (1954/5) crosses the wall to the left of the final section of *Smokey*, but it is usually very dirty and not recommended.

92. Smokeless 8m HS 4b

Climb the arête right of *Smokey* on its right side. Worthwhile but unfortunately escapable.

Tony Marr, Mike Tooke, Pete Shawcross 25th August 1996

Right of *Smokeless* is an alcove...

93. Alcove Wall 5m E1 5c

The left wall of the alcove.

Steve Brown, Dave Paul. 1980.

94. Sooty 5m S 4a

Takes the left-hand rear corner.

1960s.

95. Sweep 5m HVD

The right-hand corner.

1960s.

96. Nutter 5m VS 4b

Takes the hanging corner 7m right of *Sweep*.

Tony Marr, Eric Marr. September 1969.

Girdle Traverse

The crag has been traversed from end to end crossing every outcrop, and at various levels. Unfortunately due to the rock strata forming horizontal shelves, much of the climbing is very straight-forward, and not worth describing. However, two sections of the crag do offer interesting climbing and warrant brief descriptions.

97. Left End Traverse 25m VS 4c

Start at the foot of *En Passant*. Climb the corner for 4m then gain the traverse line running rightwards crossing *Grooves -ology*, into the corner of *Satchmo*. Continue at the same level until a step is crossed to gain the finishing corner of *Sunshine Slab* and the top. Stances should be taken as required to prevent rope drag. Contains some good climbing.

Terry Sullivan, Vic Tosh. 1959.

98. Central Girdle 45m HVS 5a

4b. Start as for *Forest Face* and follow it to the vertical crack, then continue rightwards to the stance on *Harlot's Groove* beneath the inverted V groove. Belay.

D. Continue easily to the large ledge on *Tumble Down Dick*. Belay.

5a. Traverse right from the ledge, crossing to *Omen Arête*, continue into *Waterslide* and finish along the obvious horizontal cracks to the top of *Shorter's Wall* to where the climb can be terminated. Care required to prevent severe rope drag. Once again contains some very good climbing and worth doing.

Terry Sullivan, Vic Tosh. 1959.

White Hill (aka Landslip)

OS Landranger Sheet: 93

Map Ref: NZ567038

Altitude: 390m

Aspect: East Facing

Approach: 15 minutes

Situation and Character

This impressive band of rocks flanks the east end of Hasty Bank and is easily seen from the car park at the summit of Clay Bank. Unfortunately much of the crag is prone to subsidence and great care should be exercised at all times. However, several climbs have been recorded here including two very impressive routes on the largest buttress at the centre of the crag. The remainder lie around the small outcrop at the extreme right-hand end and appear to be quite sound.

Access and Approaches

Use the approach described for Raven's Scar until the rocks come into view and a stile in the fence gives access to the boulder field beneath the crag. Follow the rising path to the right end of the rocks to where the first climbs are located. About 15 minutes from the car park at Clay Bank.

The crag can also be approached easily (in just a few minutes) from Raven's Scar, which is located about 250m further right (west).

The Climbs

The highest and most prominent buttress on Landslip (lying left of centre) has two faces either side of an arête with a square overhang at a third height.

1. Fame 8m E3 6a *

Climbs the wall on the left of the arête. Start in a corner, move right and then back left.

Ian Dunn, Simon Walker Summer 1982.

2. No Expectations 10m E6 6b

The obvious blind flake right of the arête. Bold.

Nick Dixon, Ian Dunn Summer 1982. (2 peg runners).

Franco Cookson 2012 "It's about E5/6 without the pegs?"

75m to the right is a isolated route...

3. Red Grouse 10m HS

Follows the flake and green corner crack up a slabby buttress.

1970s

**Far Right Buttress**

Some 30m right of *Red Grouse* is a compact buttress of good rock. Raven's Scar can be seen a short distance to the west from here.

4. Heather Brae 7m D

Start 2m left of the toe of the buttress at a short corner crack. Climb the crack and groove, finishing up a crack on the left.

1954/5.

5. White Hill Face 8m VD

Starts at the toe of the buttress. Climb left for a few feet and then continue directly up the face above.

Alternative Start

Traverse up and left on to the face from the foot of *The Gash*.

1954/5.

6. The Gash 5m VS 5a

Climbs the obvious gash 2m left of *Spring Crack*.

1970s

7. Spring Crack 5m VD

The obvious corner crack is climbed on good hand jams.

1954/5.
